MT600+

Battery powered electric tug

MT600+

Overview

The MasterTug range delivers unrivalled manoeuvrability when moving heavy-wheeled loads. Utilising a unique weight transfer principle, the MasterTug range can move heavy weights whilst retaining an incredibly compact machine footprint.

The design makes the MasterTug range perfect for working in confined spaces and facilitating precise movements.

With ergonomic controls, lightweight steering and an intuitive design, MasterTug takes the strain and empowers an operator to move heavy loads with complete control. A secure coupling system maximises load security and performance, guaranteeing total peace of mind.

The powerful performance of the MasterTug allows operators to push, pull and steer loads inside, outside and on slopes with complete control.

Dimensions

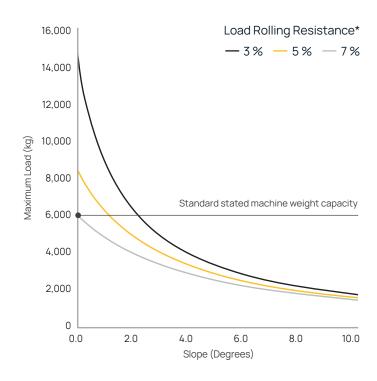

Slope Performance

The force required to move a load is based on load weight, slope angle and floor condition.

Movement on a slope increases the force required to safely start, stop and move the load.

If your application involves moving a load up or down a slope, speak to our team who will be happy to advise on which machine will meet your requirements.

^{*} Variables that affect rolling resistance include the quality of floor/terrain and the type/condition/quality of castor wheels.
